

I am a professional driver. I find that satellite radio features such as local traffic & weather conditions are important to my business. Since the federal government has changed our hours of service, I do not have a lot of extra time to spend in traffic. Most local radio stations only give traffic reports during the morning and afternoon drive times, and even then you will have to wait for up to 10 minutes to get it. Also, you have to know which stations actually have the reports for the city you are in at the time. Since I am PAYING FOR THIS SERVICE by subscribing to XM Satellite Radio, I feel that it is not the business of the local radio stations or the government to regulate this medium.
